Subject: questions from Jacobs re. carbon costs

Paul and Tom - see Anita's questions below. She's wondering if any additional costs need to be added to the estimate for broadcasting carbon.

Thanks - Dave

p.s. - thanks for the final comments on the model...hope to get to them later this week.

Hi Dave,

Does this assume broadcasting over the entire CAD cell area each year or a portion of it?

Any chance I could see what went into Paul's estimate? i.e., who is expected to do the work (subcontractor?), what equipment is being used (do we have it on site or do we need to mob/demob and rent it? Operators?), application rate? I'd like to know if I need to add any other costs to his number.

Anita
